HearthStone is the exclusive supplier of HASE products in North America. 

# Creating Warmth... Inspiring Comfort

There is a decided difference between a house and a home. It's about creating a warm welcome that goes well beyond heating – an ambiance that reflects your personal style and beckons with its genial embrace.

This concept is at the heart of every HearthStone® Stove. Designed with the beauty of a fine piece of furniture, a HearthStone Stove combines reliability with time-tested craftsmanship to become an essential part of your unique home experience.

In the spirit of true traditional craftsmanship, HearthStone's contemporary Euro Stoves are made by people who take great pride in their work. Fine European design, superior materials, and state-of-the-art development and production processes are intrinsic components of every stove in the HearthStone Euro Collection. These high quality standards mean you can be confident that you're purchasing not only the latest in aesthetic advances, but also the utmost in powerful heating technology and environmental friendliness.

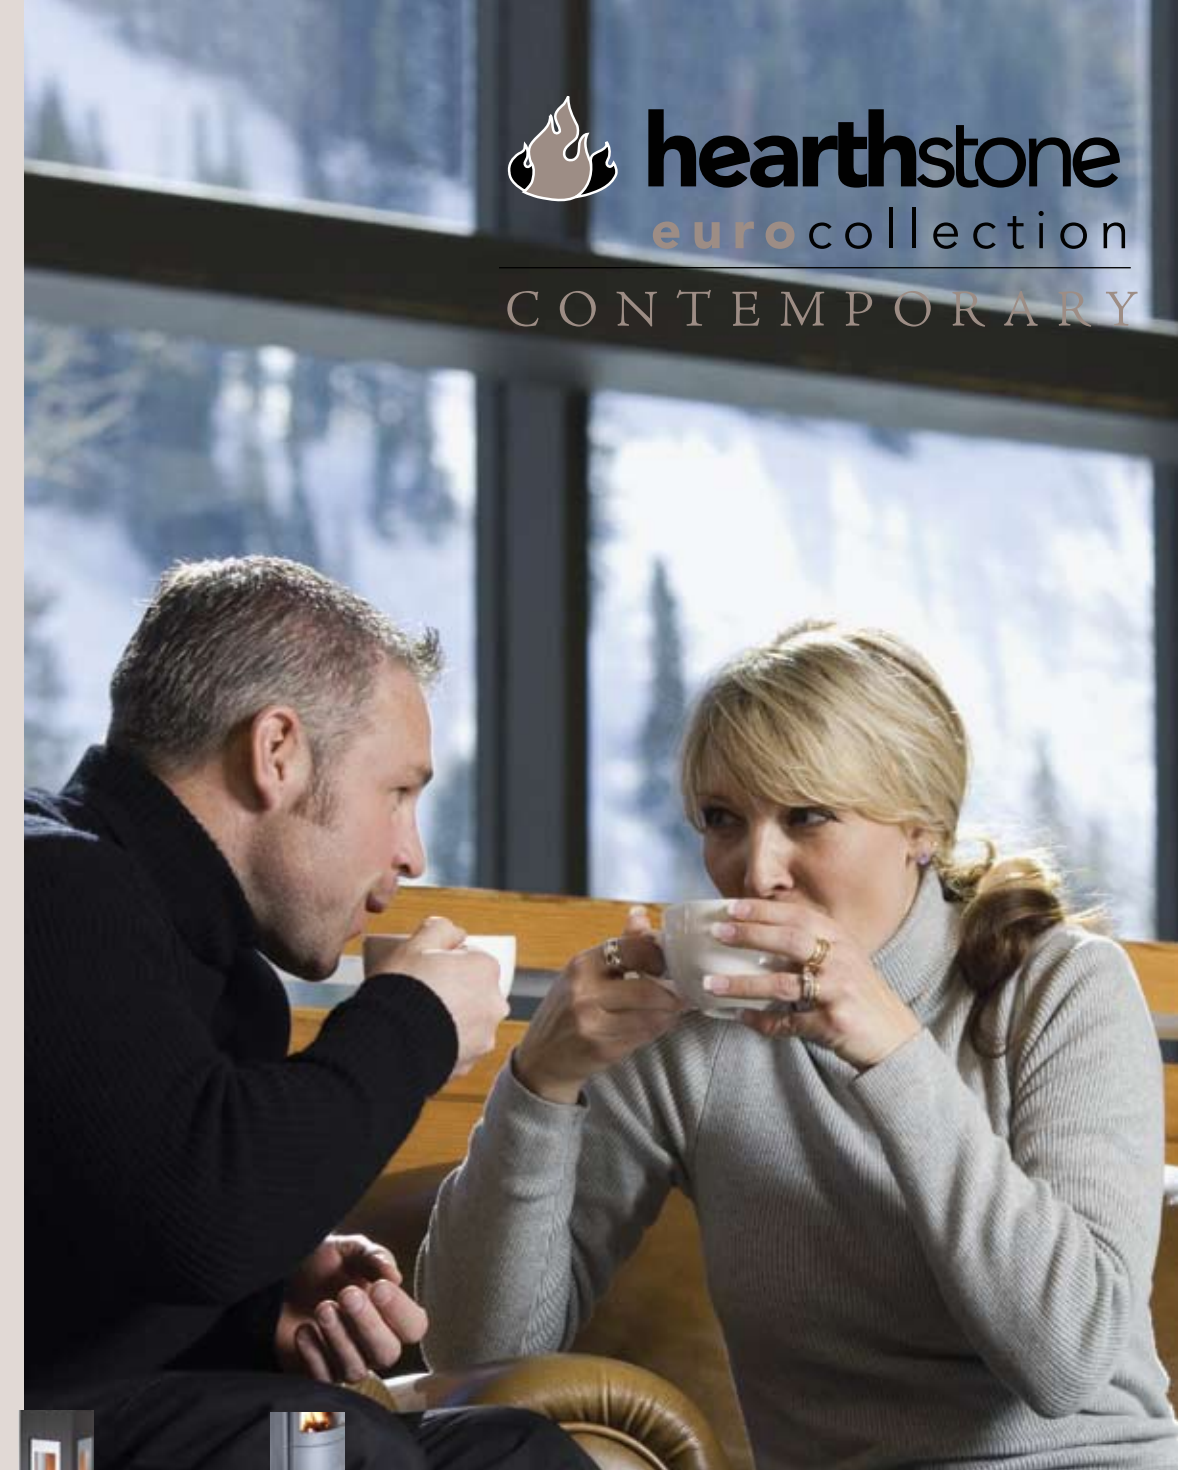

Integrity at every turn. That's what gives HearthStone Stoves their unmatched appeal, and has for over 30 years. We invite you to get acquainted with our collection of contemporary stoves starting on these pages. From sleek and sophisticated to casual and convenient, HearthStone Euro Stoves are an ideal way to bring home a special warmth – to create the heart of your home.

## There's a HearthStone That's Perfect for You...

Carbon-neutral woodburning or ultra-efficient gas-fired. Classically-styled or contemporary. For heating your entire home or just warming a single room. With so many choices – and so many finishes – the joy of HearthStone is that there's bound to be one that's perfect for you. More than a name, the HearthStone brand is an assurance – a guarantee that your appliance is built in the rich tradition of our company, and will serve you faithfully for years to come. Welcome to the world of HearthStone. We're confident you'll feel right at home.

hase **BARI**  
WOODSTOVE

Size: 35,000 BTUs | Heats up to: 1,500 sq. ft.  
EPA rating: 3.5 grams per hour | Maximum log length: 17" Loaded Vertically | Model: #8170

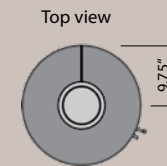

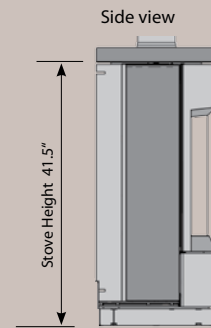

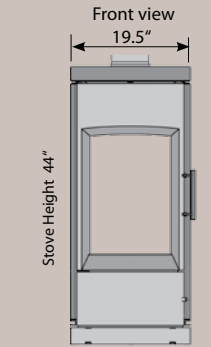

*The Bari can be rotated 180 degrees on its axis, enabling it to be positioned in 13 different locked positions.*

Size: 26,500 BTUs | Heats up to: 1,300 sq. ft. | Steady State Efficiency 74-80%  
Model: #8180

hase **BARI**  
GAS STOVE

*The Bari slim lines and styling adapt to any style of architecture. The cylindrical shape allows for a maximum capacity firebox and takes up less space than traditional rectangular stoves. Because it warms with the radiant heat of soapstone, the Bari maximizes comfort with a minimum effort.*

### Where Innovation Comes Home

Each HearthStone Euro Collection stove is born of a mission to turn fire into an experience through innovation. This concept translates on multiple fronts starting with a wide selection of designs that guarantee you'll find a stove that reflects your personal lifestyle. It carries through to exclusive design features which ensure each appliance is efficient, economical and safe — providing clean and complete combustion for warmth you can trust. This distinctive character resonates down to the last details: state-of-the-industry materials, sleek thermostatic remote controls and pioneering environmental efficiencies to name but a few.

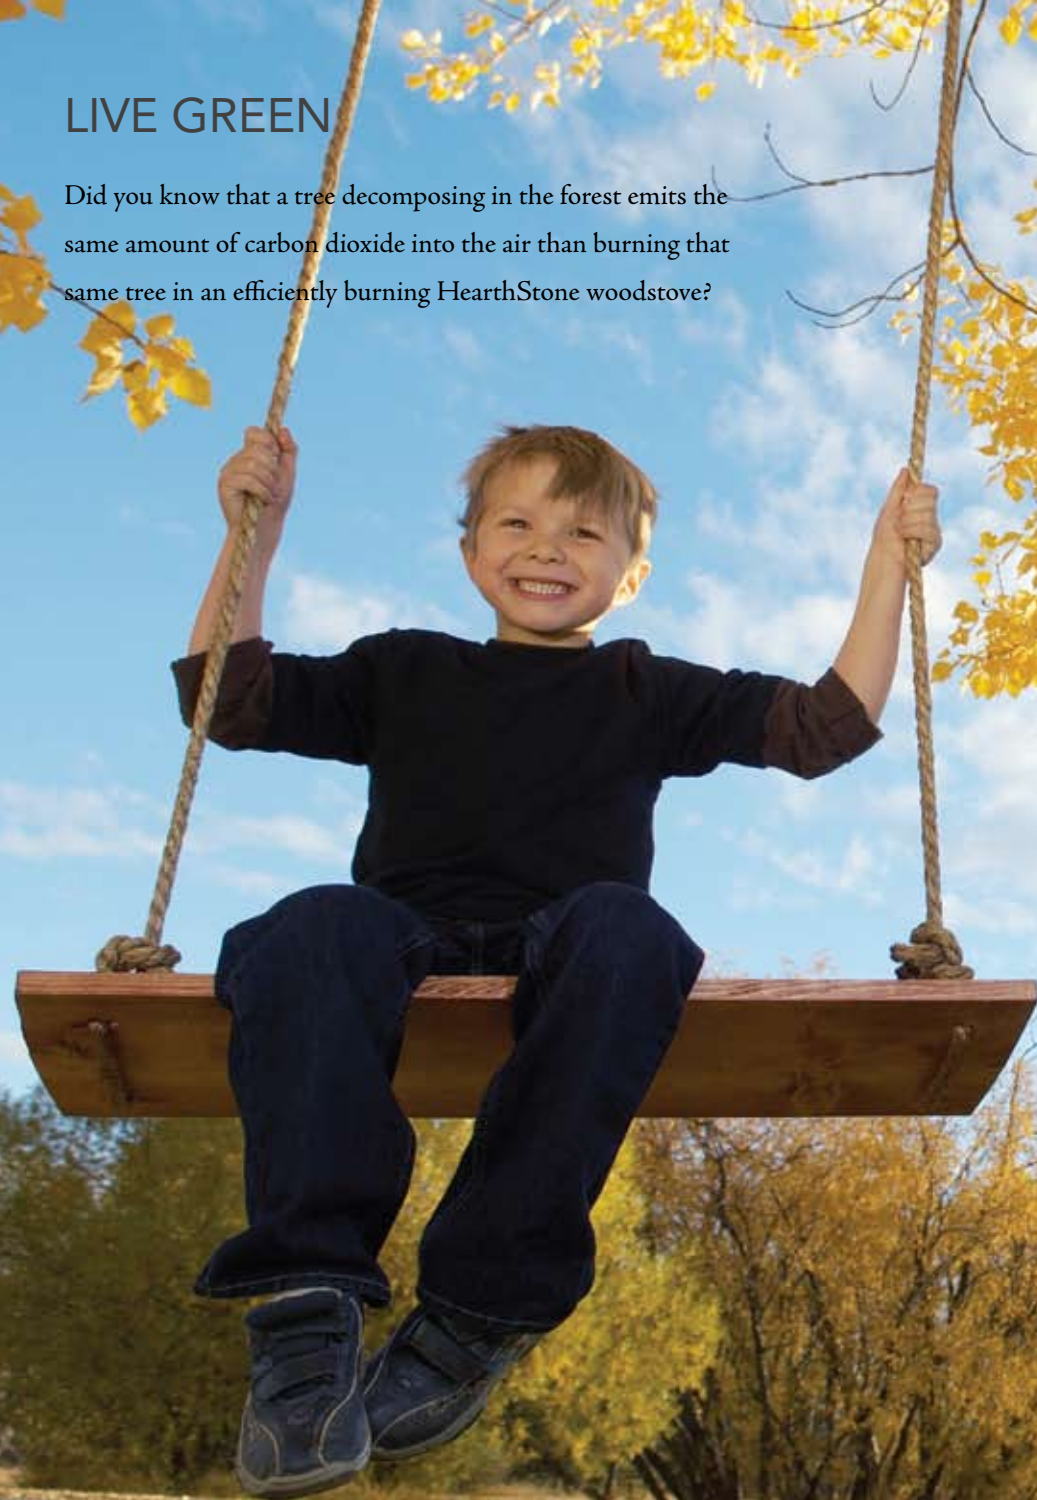

The ultra-sleek, thermostatic remote control included with every HearthStone Euro Collection gas stove allows you to light a fire, and control the room temperature, just as a thermostat, with the touch of a button.

### LIVE GREEN

Did you know that a tree decomposing in the forest emits the same amount of carbon dioxide into the air than burning that same tree in an efficiently burning HearthStone woodstove?

At HearthStone, our business is filling family homes with warmth – not just today, but for future generations as well. Whether fueled by wood or gas, our family of stoves offers viable alternative heat sources that are highly environmentally conscious. Our woodstoves utilize modern, low-emission combustion technology to create carbon-neutral burning – a factor that is a top priority for us. Similarly, our gas stoves bring the benefits of efficient zone heating, and accordingly help reduce CO2 emissions.

We're working hard to preserve nature by providing heating solutions which can help lessen the greenhouse effect. And we will continue to make climate protection – both today and tomorrow – a vital and important goal.
